*Rys. Dimensions of the Inclusive Seesaw*

### Safety:

Inclusive Seesaw complies with EN 1176.

Maximum number of people allowed to be on the swing at any one time:

- 1 walking user + 1 person in a wheelchair
- 2 walking users + 1 person in a wheelchair
- 4 walking users

Maximum load on the platform for wheelchairs: 200 kg

Maximum load on the platform for walking users: 300 kg

### Installation:

Anchoring to the ground. Amortization layer is needed. Homogeneous surface is necessary.

Make sure to provide appropriate surface surrounding the roundabout for the wheelchair users easy access!

### Features of use:

TERMA Inclusive Seesaw makes it possible to integrate people with different levels of ability in the playground. The device can be used by a person without disabilities and people in a wheelchair or with intellectual disabilities or vision problems. The device allows children to play with their peers, siblings, parent or guardian. The device allows to have fun with a form of therapy at the same time based on the vestibular therapy.

The device enables contact with a disabled person while having fun together. It has no barriers to access, both physical and cognitive.

Inclusive Seesaw doesn't need help people from outside of the device to operate it. It's operated only by users using the device.

The project fits into the assumptions of universal design, available to all potential users.

TERMA Inclusive Geometric Play Panel visually refers to the style of playground equipment, at the same time it is attractive in design.
